Maximum speed:	185+mph (est.)	Tyres - Rear:	285/35/20
Power to weight:	396 bhp/ton	Suspension:	Double wishbone coil-over spring
		Turning Circle:	12.8m

## DIMENSIONS

The Farbio GTS400 enjoys all the qualities of the normally aspirated GTS but includes an uprated supercharged engine and water cooled charge cooler. With a bespoke induction and exhaust system and along with a specially mapped ECU the GTS400 can produce an exhilarating 410 bhp. This combined with the lightweight full carbon fibre body shell delivers powerful acceleration. The GTS400 also incorporates a flat floor the full length of the car, joining the front splitter and rear diffuser, which provides exceptional downforce giving excellent handling qualities.

With the large fuel tank and lightweight carbon fibre body, touring is made simple and enjoyable.

The boot volume is large enough to fit a standard set of golf clubs, or several pieces of luggage. There is also extra luggage space on the parcel shelf, secured with optional bespoke luggage straps.

The GTS400 can also accommodate a 6'6" driver, into our fully adjustable seats.
