

# ZOO DRIVES

# 180MPH FARBIO!

**MOTOR EXCLUSIVE!** It's fast, flashy and frisky. Meet the UK's coolest new supercar, the fiendishly fabulous 180mph Farbio GTS 400!

## THE ENGINE

The GTS 400 is powered by a supercharged 3.0-litre V6 lump mounted behind the cabin for optimal chassis balance. Fitted with uprated conrods and trick pistons to boost high-rev durability, you can whip the free-revving engine to its 7,000rpm redline and unleash that killer 410bhp punch!

## ON THE ROAD

It's sensational. The slightest brush of the throttle turns the two-seater into a low-flying missile with enough pace to scare a Porsche 911. But it's not all about straight-line speed. It's so light and well-balanced that

driving this even on twisting back roads inspires confidence. Engaging, fast and talented, it makes you feel like a driving god!

## CARBON FIBRE

The key to the Farbio's skinny 1,046kg weight. The bodywork is entirely hand-made in carbon fibre, which is easily strong enough to support the ultra-stiff steel chassis. Even the huge, 20-inch wheels are made from the stuff and weigh just 7kg each!

## PRECISION ENGINEERED

The Farbio may have been made

at the company HQ in a converted barn on the edge of the Cotswolds (true fact), but there's nothing low-tech about it. The sleek coupé is beautifully fitted and finished. And the spacious and intelligently-configured cabin features a perfect driving position and fully-integrated touchscreen unit for the audio, satnav and climate controls.

## SERIOUS STOPPING POWER

If the engine feels fiendishly powerful, the brakes are out of this world. The six-pot AP Racing callipers and race-spec pads

grip dustbin lid-sized brake discs and dish up phenomenal performance. So you can fire the Farbio down the straights, then lean hard on the brakes before pitching it into the next corner!

## THE STATS

**Engine:** 3.0-litre supercharged V6

**Max power:** 410bhp at 6,500rpm

**Max torque:** 560lb ft at 6,100rpm

**Kerb weight:** 1,046kg

**0-60mph:** 3.7 seconds

**Top speed:** 180mph

**Price:** £92,000

**HAND-BUILT  
ULTRA-LIGHT CHASSIS!**
